DETAILED ACTION

1. Amendment filed 04/15/2010 has been received and fully considered.
2. Claims 11-16 and 19-21 are pending.

Allowable Subject Matter

3. Claims 11-16 and 19-21 are allowed.
4. The following is an examiner's statement of reasons for allowance: The prior art teaches methods for subscriber stations to communicate using a combination of both quantum lines and public lines. The prior art further teaches encryption key and quantum encryption key exchanges. However, the prior art fails to specifically disclose "a switching station associated with a called subscriber station generates a third key bit sequence from the key bit sequences generated via the quantum channels and transmits this third key bit sequence to the called subscriber station which, using the key bit sequence known to it and generated by it together with the associated switching station, from the third key bit sequence generates the key bit sequence generated on the part of the calling subscriber station, which then finally is used as a mutual key for the communication between the subscriber stations" when in combination with the remaining claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Berzanskis teaches methods of using both quantum and public lines for securely exchanging data.
